SUMMARY

I'm a Front-End Developer specializing in JavaScript, working with React, Vite, Next.js, and Tailwind CSS. When building with this stack, I create smooth and visually appealing UX/UI experiences throughout the application. I have a strong drive to continuously improve, staying self-motivated to learn new technologies every day. I adapt easily to any work environment and am eager for the opportunity to contribute when my time comes.

PROJECTS

OverSized Vehicles GPS App

- Built with **React, Next.js, Typescript, and TailwindCSS**.
- Designed for all vehicles commercial and personal uses.
- Customized routes for bigger vehicles for safer roads.

Jeopardy Game.

- **Designed and developed a fully functional Jeopardy game using React, Next.js, and Tailwind CSS**
- Implemented game logic to handle category selection, question answering, and score tracking, allowing for real-time updates and a smooth user experience. Includes dynamic text effects
- Created a responsive user interface that adapts to various screen sizes

Portfolio

- Built with **React, Next.js, and Tailwind CSS**
 - Features smooth animations with Framer Motion
 - Provides seamless navigation with App Routing
-
