FRONT-END DEVELOPER,
REACT.JS, VITE.JS, NEXT.JS, & TAILWIND CSS

SUMMARY

I'm a **Front-End Developer** specializing in **JavaScript,** working with **React, Vite, Next.js, and Tailwind CSS.** When building with this stack, I create smooth and visually appealing UX/UI experiences throughout the application. I have a strong drive to continuously improve, staying self-motivated to learn new technologies every day. I adapt easily to any work environment and am eager for the opportunity to contribute when my time comes.

PROJECTS

Trucks & Trailers GPS!
- **Built with React, Next.js, TailwindCSS, and MongoDB.**
- Designed for all vehicles, including large trucks with trailers and small cars.
- Customizes routes specifically for trucks and trailers.
- Avoids restricted highways and streets.
- Ensures safe, legal, and efficient navigation logic to the code.
- Still working on it!

Jeopardy Game!
- **Designed and developed a fully functional Jeopardy game using React, Next.js, and Tailwind CSS.**
- Implemented game logic to handle category selection, question answering, and score tracking, allowing for real-time updates and a smooth user experience.Includes dynamic text effects
- Created a r**esponsive user interface** that adapts to various screen sizes!

Portfolio!
- **Built with React, Next.js, and Tailwind CSS**
- Features s**mooth animations with Framer Motion**
- Includes dynamic **text effects**
- Provides seamless navigation with **App Routing**

PROFESSIONAL EXPERIENCE

Web Development Consulting | PSB   **Aug 2024 - Sep-2024**

Connecticut, United States Freelance
- Partnered with a marketing company to enhance their **web design** service offerings, delivering strategic insights to improve client website performance and user experience with **React.js & CSS**
